

## **Tutorial: Introduction to rule base modeling and BioNetGen**

Marek Kochańczyk

Tuesday, June 12, 5:20-6:20 PM

In this tutorial, I will first explain the key ideas underlying rule-based modeling. Then, I'll show how to encode biomolecular interactions in a computer-readable manner -- using BioNetGen language. Finally, I will demonstrate how to use BioNetGen, a general-purpose simulator for both deterministic and stochastic simulations of biochemical systems.
